Introduction

The Ministry of Education and Technical Education recognizes the importance of empowering teachers with effective tools that elevate classroom performance, enhance the quality of education, and improve its outcomes. This is a real response to the voices of teachers, interacting with the feedback channels from the educational field, and meeting the needs of teachers for flexible and comprehensive educational tools that assist them in fulfilling their noble educational mission.

This book has been designed to serve as an integrated educational support for teachers, helping them in planning and executing their teaching tasks efficiently. It also facilitates continuous assessment processes. The content has been designed to offer diverse models of effective classroom performance and educational activities created based on an interactive methodology that enhances active learning. It contributes to a qualitative shift in teaching practices, clearly focusing on the student as the core of the educational process.

The book includes formative and diagnostic questions, as well as purposeful learning tasks that students can complete as homework, enhancing the integration of learning inside and outside the classroom and contributing to the sustainable construction of learning for students. These tools help develop critical and creative thinking, deepen understanding, and support and enhance student motivation, giving them a sense of achievement and excellence.

It also includes short weekly tests and periodic assessments, allowing teachers to measure the extent of learning outcomes and address learning gaps early, providing feedback on the initial results. The performances at the end of each month are concluded with immediate training sessions that help improve student performance. These assessments are gradual, taking into account individual differences and targeting various levels of cognitive development, within a framework of diversity, depth, and integration, preparing students for monthly tests efficiently.

This book is a true translation of the Ministry's directions to ease the burdens on parents, provide supporting educational content that enriches the classroom environment, and allow teachers more time for educational innovation and productive interaction with their students. It also forms an effective tool in supporting the Ministry's direction to enhance learning outcomes, achieving a real transformation in the learning environment—from memorization to understanding, from rote learning to application, and from passive reception to active participation.

When we place this work in the hands of teachers and students, we hope it will be a valuable contribution to improving academic performance, enhancing the quality of education, and becoming an additional cornerstone in building a generation that is aware and knowledgeable, equipped with the skills and competencies needed for success in a world that demands creativity and innovation. It aims to have a tangible impact in realizing an ambitious educational vision for the future of education in our beloved country.

Allah is the one sought for help, and He guides to the right path...

Homework:

Read the text and answer the questions:

Extreme Weather Events

Nature can sometimes change in powerful ways, leading to extreme weather. A sandstorm carries strong winds and dust, making it hard to see. During a heatwave, temperatures become dangerously high for many days. A flood happens when too much water covers dry land, often causing damage. When there's no rain for a long time, it's called a drought, which can harm crops and animals. Learning about these events helps us understand how to stay safe.

Choose the correct answer from a, b , c , or d:

1-What is it called when a lot of water covers dry land?

a) Sandstorm b) Heatwave c) Flood d) Drought

2-Which extreme weather event involves dangerously high temperatures for many days?

a) Flood b) Sandstorm c) Heatwave d) Drought

Answer the following questions:

3-What makes it hard to see and breathe during a sandstorm?

...Strong winds and dust make it hard to see and breathe.....

4-How can a drought affect plants and animals?

...It can harm crops, plants, and animals.....

5-Why is it important to learn about extreme weather events?
